

Ministry of Works, Communications and Housing  
P.O. Box 10, Entebbe.

22nd December 1971

Ref. EC.E.3/4.II

The Secretary  
The Institution of Engineers (India)  
8, Gokhale Road, Calcutta

Dear Sir,

I refer to your BCT/158 dated 9th December 1971.

The Board entirely bases its assessment of Indian qualified engineers on the list of Universities approved by your Institution. There is no other way of ascertaining the level of your degree other than this.

If a candidate has satisfied the Board that his basic qualifications are acceptable as above, then he has got to fulfill other conditions. These are:

- (1) He should have practical experience acceptable to the Board of not less than three years, and
- (2) That he has performed such works that are normally performed by qualified professional engineers.

Where the letter cannot be assessed from the credentials, the candidate is required to appear before the meeting of the Board, where he is interviewed and in some cases is required to produce the latest document of his work, such as design, construction, or projects that he has been supervising.

Thus it is imperative that your Institution keeps us informed of the list of acceptable degree recognized by it.

Yours faithfully  
Sd/-  
(Eng. G.W. Owarga)  
Registrar  
Engineers's Registration Board
